AGL DECCOX PLTS

FS2105

MEDICATED

For the prevention of coccidiosis caused by Eimeria bovis and Eimeria zuernii.

ACTIVE DRUG INGREDIENT

Decoquinatate.....1134.99 g/ton (0.1248%)

GUARANTEED ANALYSIS

Crude Protein.....not less than 14.39%
Fat.....not less than 2.02%
Fiber.....not more than 7.94%

INGREDIENT

Processed Grain By-Products, Grain Products.

FEEDING DIRECTIONS

Each pound of this supplement contains 567.5 mgs. /lb. of Decoquinatate. Feed as a top dress or mix into the daily ration to provide 22.7 mg per 100 lb. of body weight (0.5 mg/kg) of Decoquinatate per head/day. Feed at least 28 days during periods of exposure to coccidiosis or when it is likely to be a hazard.

WARNING:

Do not feed to cows producing milk for food. Feed for at least 28 days during periods of coccidiosis exposure or when experience indicates that coccidiosis is likely to be a hazard.

CAUTION:

Do not use in feeds containing bentonite.

FEEDING DIRECTIONS

This supplement is designed to be fed to cattle at the rate of 0.75 lbs. to 1.50 lbs. per head daily. This is not a complete feed. Always provide adequate forage and fresh, clean water. Warning: excessive consumption may result in adverse toxic reactions! Use only as directed. Caution: consumption should be carefully controlled until animals become adjusted to the feed. Additional care should be exercised with starved, stressed or debilitated animals. Follow directions carefully.

DO NOT FEED TO SHEEP DUE TO HIGH LEVELS OF SUPPLEMENTAL COPPER.

R1500 PLT

FS2927

MEDICATED

Growing cattle on pasture (stocker and feeder cattle and dairy and beef replacement heifers):
For improved feed efficiency; for prevention and control of coccidiosis due to *E. bovis* and *E. zuernii*.

ACTIVE DRUG INGREDIENT

Monensin (as Monensin sodium).....1510.2 g/ton

GUARANTEED ANALYSIS

Crude Protein.....not less than 15.22%
Fat.....not less than 2.48%
Fiber.....not more than 8.87%
Calcium.....not less than 0.12 not more than 0.15%
Phosphorus.....not less than 0.86%
Salt.....not less than 0.05 not more than 0.6%
Potassium.....not less than 0.84%

INGREDIENTS: Processed Grain By-Products, Grain Products, Water.

FEEDING DIRECTIONS: Feed as directed by your nutritionist.

CAUTION: Do not allow horses or other equines access to formulation containing Monensin. Ingestion of Monensin by equines has been fatal. Monensin medicated cattle and goat feed is safe for use in cattle and goats only. Consumption by unapproved species may result in toxic reactions. Feeding undiluted or mixing errors resulting in high concentrations of Monensin has been fatal to cattle and could be fatal to goats. Must be thoroughly mixed in feeds before use. Do not feed undiluted. Do not exceed the levels of Monensin recommended by the feeding directions, as reduced average daily gains may result. If feed refusals containing Monensin are fed to other groups of cattle, the concentration of Monensin in the refusals and amount of refusals fed should be taken into consideration to prevent Monensin overdosing. A withdrawal time has not been established for pre-ruminating calves. Do not use in calves to be processed for veal.

LIMITATIONS: Feed to mature reproducing beef cows. Feed as supplemental feed, either hand-fed in a minimum of 1 pound of feed or mixed in a total ration. For improved feed efficiency, feed continuously at a rate of 50 to 200 milligrams Monensin per head per day. For prevention and control of coccidiosis, feed at a rate of 0.14 to 0.42 milligram per pound of body weight per day, depending upon severity of challenge, up to a maximum of 200 milligrams per head per day. During first 5 days of feeding, cattle should receive no more than 100 milligrams per head per day. This product was made in a feed manufacturing facility that does not handle or store products containing animal proteins prohibited in ruminant feed.

B1800 Pellet
FS2932

MEDICATED

For improved feed efficiency and increased rate of weight gain in cattle and sheep fed in confinement for slaughter.

ACTIVE DRUG INGREDIENT

Lasalocid (as Lasalocid Sodium).....1,794 gm/ton

GUARANTEED ANALYSIS

Crude Protein, (Min).....15.50%
Crude Fat, (Min)2.56%
Crude Fiber, (Max)8.33%

INGREDIENTS

Processed Grain By-Products

CAUTION: USE ONLY AS DIRECTED. INTENDED FOR FEEDING BEEF CATTLE ONLY.

DIRECTIONS FOR USE:

Each pound of this product contains 0.9 gm (900 mg) lasalocid. For improved feed efficiency in cattle fed in confinement for slaughter: Mix this product at 11.1 to 33.3 lb per ton of finished feed to provide 10 to 30 gm lasalocid/ton. Feed mixed feed continuously to provide not less than 100 mg nor more than 360 mg lasalocid per head daily. For improved feed efficiency and increased rate of weight gain in cattle fed in confinement for slaughter: Mix this product at 27.8 to 33.3 lb per ton of finished feed to provide 25 to 30 gm lasalocid/ton. Feed mixed feed continuously to provide not less than 250 mg nor more than 360 mg lasalocid per head daily. CAUTION: The safety of lasalocid in unapproved species has not been established. Do not allow horses or other equines access to lasalocid as ingestion may be fatal. Mix thoroughly with grain and/or roughage prior to feeding. Feeding undiluted or mixing errors may result in an excess lasalocid concentration that could be fatal to cattle and sheep. WARNING: A withdrawal period has not been established for this product in pre-ruminating cattle. Do not use in calves to be processed for veal.

FEEDING DIRECTIONS

DO NOT FEED FREE CHOICE. This is not a complete feed. Always provide clean water and adequate forage. For increased rate of weight gain: Feed at the rate of 1.76 to 8.25 lbs./head/day to provide 60 to 280 mg. of Lasalocid when on pasture. For control of coccidiosis: Feed at a rate to provide 1 mg Lasalocid per 2.2 lbs. (1.0 kg.) of body weight (1.33 lb. 16% Stocker Pasture B68 per 100 lbs. body weight daily) to a maximum 280 mg Lasalocid (8.25 lbs.)/head/day. Each pound of this product provides 34 mg Lasalocid. Feed continuously to cattle up to 620 pounds body weight. WARNING: A withdrawal period has not been established for this product in pre-ruminating cattle. Do not use in calves to be processed for veal. CAUTION: The safety of Lasalocid for use in unapproved species has not been established. Do not allow horses or other equines access to feed containing Lasalocid as ingestion may be fatal.

INGREDIENTS

Processed Grain By-Products, Roughage Products, Molasses Product, Calcium Carbonate, Salt, Sodium Selenite, Zinc Sulfate, Manganese Sulfate, Copper Chloride, Ethylenediamine Dihydriodide, Cobalt Carbonate, Mineral Oil, Vitamin A Supplement, Vitamin D3 Supplement, Vitamin E Supplement.

DIRECTIONS FOR USE

This product is to be fed to pre-weaned calves through creep feeders. Feed intake will vary depending on size and age of the calf and forage availability. Optimum intake is 4 to 6 lb per head daily. This is not a complete feed. Maximum intake is 8.25 lb per head per day. Always provide adequate amounts of forage and fresh, clean water. When using a creep feeder, adjust the feeder slide gate to control feed accumulations at the trough. Troughs should be well protected and managed to prevent accumulation of fines, wet or moldy feed.

Do not feed to sheep due to high levels of supplemental copper.

VFD AUREO 4 GRAM

FS6517

MEDICATED FOR BEEF, SHEEP, AND NON-LACTATING DAIRY CATTLE

ACTIVE DRUG INGREDIENT

Chlortetracycline.....4 gm/lb

GUARANTEED ANALYSIS

Crude Protein, (Min).....	14.00%
Crude Fat, (Min).....	2.00%
Crude Fiber, (Max).....	8.00%
Acid Detergent Fiber (ADF), (Max).....	9.00%
Calcium (Ca), (Min).....	0.38%
Calcium (Ca), (Max).....	0.40%
Phosphorus (P), (Min).....	0.70%
Potassium (K), (Min).....	0.80%

INGREDIENTS

Processed Grain By-Products, Grain Products.

DIRECTIONS FOR USE

AUREO 4 GRAM can be top-dressed on individually fed rations or thoroughly mixed with the regular ration. In calves, beef and non-lactating dairy cattle: For control of bacterial pneumonia associated with shipping fever complex caused by *Pasteurella* spp.: Feed AUREO 4 GRAM at 0.0875 lb/head/day to provide 350 mg chlortetracycline/ head/day (0.35 g/head/day). For control of active infection of anaplasmosis caused by *Anaplasma Marginale* susceptible to chlortetracycline in beef cattle: For cattle under 700 lb, feed AUREO 4 GRAM at 0.0875 lb/head/day to provide 350 mg chlortetracycline/head/day (0.35 g/head/day). For cattle over 700 lb, feed AUREO 4 GRAM at 0.0125 lb/100 lbs. bodyweight/day to provide 0.5 mg chlortetracycline/lb bodyweight daily (0.125 lbs to provide 0.5 g/head/day for 1000 lb. animal). For treatment of bacterial enteritis caused by *Escherichia Coli* and bacterial pneumonia caused by *Pasteurella Multocida* organisms susceptible to chlortetracycline: Top-dress AUREO 4 GRAM at 0.25 lb/100 lbs. bodyweight/day for 3 to 5 days to provide 10 mg chlortetracycline/lb bodyweight (1.25 lbs. to provide 5 g/head for a 500 lb. calf). Do not treat for more than 5 days. For increased rate of weight gain and improved feed efficiency in calves (250 to 400 lb): Feed AUREO 4 GRAM at 0.00625 to 0.0175 lb/head/daily to provide 25 to 70 mg chlortetracycline. For increased rate of weight gain and improved feed efficiency and reduction of liver condemnation due to liver abscesses in growing cattle over 400 lb: Feed AUREO 4 GRAM at 0.0175 lb/head/daily to provide 70 mg chlortetracycline. In sheep: As an aid in reducing the incidence of vibronic abortion in breeding sheep: Feed 0.02 lb AUREO 4 GRAM/head/day to supply 80 mg chlortetracycline/head daily. Feed continuously during pregnancy. **WARNING:** A withdrawal period has not been established for this product in pre-ruminating cattle. Do not use in calves to be processed for veal. Use of feed containing this veterinary feed directive (VFD) drug in a manner other than as directed on the labeling (extralabel use), is not permitted. For calves, beef and non-lactating dairy cattle: For control of bacterial pneumonia associated with shipping fever complex caused by *Pasteurella* spp.; Control of active infection of anaplasmosis caused by *Anaplasma Marginale* susceptible to chlortetracycline; Treatment of bacterial enteritis caused by *Escherichia Coli* and bacterial pneumonia caused by *Pasteurella Multocida* organisms susceptible to chlortetracycline; For increased rate of weight gain and improved feed efficiency in calves (250 to 400 lb); For increased rate of weight gain and improved feed efficiency and reduction of liver condemnation due to liver abscesses in growing cattle over 400 lb. For sheep: Aid in reducing the incidence of (vibronic) abortion caused by *Campylobacter Fetus* infection susceptible to chlortetracycline.
